The Ecologist

Journal of the Post Industrial Age

INDEX

Vol. 11 1981

INDEX OF AUTHORS

Alcalay, Glenn: A Tale of Two Islands: Bikini and Enewetak 5: 222-227

Bower, Joanne: Black Hormones — Action or Procrastination? 3: 144-145
Brunetti, Pierre Marie: A New Look at Contraception 4: 174-177
Bunyard, Peter: Windscale — Who Needs It? 2: 82-92
The Fast Reactor — A Pipe Dream 6: 296-297
Bunyard Peter and Goldsmith, Edward: France — Country of the Atom 6: 293-296
Bunyard, Goldsmith and Hildyard: A State Within a State *(Editorial)* 6: 250-252

Castleman, Barry and Vera Vera, Manuel: The Selling of Asbestos 3: 108-117
Chasin, Barbara — See Franke, Richard
C.S.E.N.E. (The Committee for the Study of the Economics of Nuclear Electricity) The True Cost of Nuclear Energy — A Special Report 6: 254-290

Epstein, Samuel and Swartz, Joel B: Fallacies of Lifestyle Cancer Theories 5: 204-209

Franke, Richard and Chasin, Barbara: Peasants, Peanuts, Profits and Pasturalists 4: 156-168

Goldsmith, Edward: Thermodynamics or ecodynamics? 4: 178-195
Superscience: Its Mythology and Legitimisation 5: 228-241
Goldsmith, Edward and Bunyard Peter: France — Country of the Atom 6: 293-296
Goldsmith, Bunyard and Hildyard: A State Within a State *(Editorial)* 6: 250-252
Grainger, Alan: The Battle of Terania Creek 1: 44-47
Reforesting Britain: Special Report 2: 56-81

Hall, Ross Hume: Nutrition and Cancer 2: 93-99
Harvey, Joan, Piccioni, Richard and Pisello, Daniel: Cleaning up Three Mile Island: How Many will Die? 3: 133-142
Hildyard, Nicholas: Can We Trust Scientists? *(Editorial)* 1: 2-3
Forestry for the Future *(Editorial)* 2: 54-55
The Fifty Year Cover-up *and* Asbestos Fall-out at Johns Manville 3: 112-113
The Riots: Reaping the Bitter Harvest *(Editorial)* 4: 154-155
Rationalising the Impossible *(Editorial)* 5: 202-203
A State within a State *(Editorial with Goldsmith and Bunyard)* 6: 250-251
Hughes, Donald: Early Greek and Roman Environmentalists 1: 12-20

Kollerstrom, Nicholas: Our Daily Lead 3: 146-147
Komanoff, Charles: Nuclear Power Costs — the U.S. Experience 6: 298-301

Lovins, Amory and Lovins, L. Hunter: Energy — What's the Problem? 6: 302-313

Martin, Brian: The Scientific Straitjacket 1: 33-42
Morris, Brian: Changing Conceptions of Nature 3: 130-137

Piccioni, Richard — see Harvey, Joan
Pisello, Daniel — see Harvey, Joan
Pollard, Nigel: The Gezira Scheme: A Study in Failure 1: 21-32

Shapiro, Mark — see Weir, David
Sinsheimer, Robert: The Presumptions of Science 1: 4-11
Spencer, Sir Kelvin: Chairman's Forward to C.S.E.N.E. Special Report 6: 256
Swartz, Joel B — see Epstein, Samuel

Tendron, B — see Terrasson, F
Terrasson, F and Tendron, B: The Case for Hedgerows 5: 210-221
Tolbert, Paige: A Different Kind of Drug Abuse 3: 143

Vera Vera, Manuel — see Castleman, Barry
Vogtmann, Hartmut: The Quality of Plant Foods 4: 169-173

Weir, David and Shapiro, Mark: The Poisoned Circle 3: 118-128

SUBJECT INDEX

Agriculture — antibiotics in animal feeds 7:143
biodynamic practices can be economically sound 4: 169-173
chemical residues in beef 3: 122
drought in the Sahel 4: 156-166
expansion of herds leads to desertification 4: 136
factory farming leads to ill health 3: 144-145
feeding powdered milk to calves is economic lunacy 3: 145
fertilisers show negative effects 4: 170-173
Gezira irrigation scheme ecological disaster 1: 21-32
hedgerows — a valuable resource for farmers 2: 72; 5: 210-218
hormones used in meat production 3: 144-145
integrating farming and forestry: the Fassfern experiment 2: 70-74
lead pollution in vegetable crops 3: 146-147
loss of variety in cereals a potential disaster 3: 126-127
nitrate increases recommended 4: 169
pasturalist traditions destroyed in the Sudan 4: 156-168
quality of plant foods 4: 169-173
true effects of overgrazing in Niger 4: 156-168
Antibiotics — bacteria becoming increasingly resistant 3: 143
Animals — attitudes in Ancient Greek and Roman cultures 1: 12-20
Aristotle — 'Father of animal ecology' 1: 17
Asbestos — compensation claims crippling the US industry 3: 108-118
disease and death following fall-out in USA and Britain 3: 113
fall-out at Johns-Manville plants 3: 113
fifty-year cover-up 3: 110-111
health risks in houses and schools in Puerto Rico 3: 112-113
production and sales uncontrolled in the Third World 3: 108-113
secrecy and misinformation 3: 109
Atomic Energy Commission — 5: 225
Australia — last tropical rain forest under threat 1: 44-47
scientists oppressed 1: 33-43

Baby foods — contain hormone traces and lead 3: 145-148
Bias — in scientific research 1: 2-3
Bilharzia — still a serious threat in Niger 1: 24-25
Biotechnic Revolution — justified by scientists 5: 228-241
Birds — decrease in species following deforestation 2: 63
Bikini and Enewetak — tragic consequences of Bikini islanders' return in 1968 may be repeated in Enewetak 5: 222-227
BNFL — see Nuclear power

Cancer — asbestos as a cause 3: 108-109
— caused by chemicals 5: 209
— dietary fats and other diet factors 2: 93-99; 5: 304
— fallacies of life-style theory 5: 204-209
— occupational hazards 5: 204-209
— personal survival strategy 2: 99
— Seventh Day Adventists — less prone 2: 94
— smoking as a cause obscures other factors 5: 204
CAP — affects quality of farm produce 4: 169-173
C.E.G.B. (see also Nuclear power) — deceptive figures re-examined 6: 260-264
Chemicals (see also pesticides) — chart of manufacturers listing those banned, under review or unrestricted 3: 121
the poison circle 3: 118-128
Christianity and technology — 5: 202-203
Coal — more economical than nuclear energy 6: 278-279
Common Market — see CAP
Compensation — costs in asbestosis 3: 108
Contraception — better alternatives 4: 174-178
side effects of the pill 4: 174-178
Cotton — destruction caused by British Cotton Growing Association in Niger 1: 21
C.S.E.N.E. (Committee for the Study of Economics of Nuclear Electricity) — Special report (see also nuclear energy) 6: 250-290
summary and recommendations 6: 256—257
conclusions 290
Cover-ups — in the chemical industry 1: 2-3; 3: 118-128
of harmful effects of asbestos 3: 109

Darwin — The Origin of Species 3: 135
DBCP — see Pesticides
Deforestation — consequences to wildlife, agriculture and natural vegetation 2: 61-63
Diet — its role in prevention of cancer 2: 93-99
importance of fibre 2: 95
Drugs (see also antibiotics) — used in animal feeds 3: 143

Ecosystems — complexity, diversity and stability 4: 183-184; 5: 228-241
Economics — and entropy 4: 178-191
of nuclear power 6: 250-290
Elitism — in the scienfitic community 1: 35

Energy — a re-examination of the 'energy crisis' 6: 302-312
Enewetak — see Bikini
Entropy — the Second Law of Thermodynamics 4: 178-195
EPA — warnings of toxic hazards ignored by chemical companies 1: 2
attitude to Three Mile Island aftermath 3: 138
unable to control pesticide industry 3: 128
Erosion — caused by deforestation 2: 61-63
result of overgrazing and increased herd sizes in Niger 4: 165-166
Exports — asbestos 3: 108-113
chemicals and pesticides to the Third World 3: 118-128
peanuts from Niger 4: 157-159

Farming — see agriculture
Fassfern — experiment 2: 70-74
Food (see also diet) — contaminated by factory farm practices 3: 144-145
effects of chemical inputs on health 3: 122
imports to USA made 'perfect' with liberal use of pesticides 3: 123
Forestry (see also trees & timber) Reforesting Britain — Special issue 2: 56-81
and agriculture 2: 70-73
Australia's last tropical rain forest threatened 1: 44-47
availability of land for reforestation 2: 77
background to Britain's eroded forest cover 2: 61-63
controlled by business interests in Australia 1: 44-47
costs of reforestation 2: 79
France — Country of the atom 6: 294-296

Gaia — the hypothesis that conditions favourable for life were created by the biosphere 4: 182; 5: 202
Genetics — damage from fall out in the Marshall Islands 5: 224
uniformity in agricultural seed a potential disaster 3: 126-127
Genetic engineering — backed by the Methodist Church 5: 202-203
ethical doubts 1: 4-11
hazards 1: 7
regarded by Prigogine as an ecological activity 5: 241
Gezira — irrigation scheme beset with troubles 1: 21-31
God — and scientists 5: 202-203
Greeks — environmentalists in Classic period 1: 12-20
cosmological perspective 4: 131

Hazards — faced by asbestos workers 3: 112-113
of chemicals in foodstuffs 3: 118-128
of hormone injections 3: 144-145
Health — abnormal growth of babies in Italy 3: 144-145
antibiotics ceasing to control certain bacteria 3: 143
damage caused by lead in vegetables 3: 146-147
hormones used in meat production harmful to consumers 3: 144-145
malaria and schistosomiasis increasing in the Sudan 1: 22-26
Hedgerows — importance to wildlife 5: 210-218
value to farmers 2: 59 and 72; 5: 210-218
Herbicides — long term damage to soil 4: 170
used in forest clearance in Latin America 3: 125
Hippocrates — an early environmentalist 1: 16
Hobbes — a view of mankind 3: 133-134
Hormones — used in meat production 3: 144-145

Inner cities — in turmoil 4: 154-155

Irrigation — Gezira scheme 1: 21-31
in Ancient Egypt 1: 26-27
Isotopes — fractionation techniques as an example of doubtfully valuable research 1: 8

Jefferies, Richard — mystical view of nature 3: 136

Kitchener, Lord — inspects experimental farms in the Sudan in 1913 1: 22
Koestler, Arthur — on the Second Law of Thermodynamics 4: 179

Lancet — editorial on harmful drugs quoted 1: 3
Lead — in vegetables 3: 146-147
Leaks — in nuclear plants 2: 82-92

Malaria — increasing in the Sudan 1: 22-26
not controlled by antibiotics 3:143
Marshall Islands — see Bikini and Enewetak
Meat — hormones used in production 3: 144-145
tainted when imported to US from Latin-American countries 3: 121
veal-based baby foods contain traces of hormones 3: 144-145
Methodist church — approves modern technology including genetic engineering 5: 202-203
Monoculture — see peanuts
Moors and heaths — invaded by gorse after deforestation 2: 62-63
Multinationals — appalling record in chemical manufacture and export 3: 120-123
cover-ups in the asbestos industry 3: 109

Nature — man's changing view 3: 130-137
Newton, Sir Isaac — mechanistic view of the Universe 3: 132
New Zealand — scientists subject to suppression 1: 34-35
Niger — illness and death caused by drought 4: 156-168
Nomads — deprived of traditional grazing lands 4: 156-168
North Sea Oil — revenues should be used to fund reforestation in UK 2: 79-81
Nuclear Energy (see also *Digest* index) C.S.E.N.E. — Special Report 6 250-290
CEGB's planning record 6: 260-264
costs — past, present and future examined 6: 276-283
disposal problems 6: 289
early uncertainties 6: 270-271
Ecologist's editors visit Windscale 2: 82-92
French and British reprocessing policies compared 6: 82-92
Government's Nuclear Power Programme examined 6: 258-259
leaks at Windscale 2: 82-92
problems associated with Fast Reactors 6: 296-297
silo fire at Le Hague 6: 87
supported by the Methodist church 5: 208
test sites on the Marshall Islands 5: 222-227
US costs escalation 6: 298-301
Nutrition — importance in control and care of cancer 2: 93-99

OSHA (US Occupational Safety and Health Administration) — lacks teeth to impose proper controls 3: 110

Peanuts — chief export from Sahel countries 4: 157-160
ecological problems 4: 160-163
production destroys peasant economy and drives out pasturalists 4: 160-166
Pesticides — cause vast numbers of deaths and disabling illness in Third World 3: 118-128
chart showing main producers and their products 3: 121
dishonesty in the multinationals 1: 2-3

sterility in workers 3: 118-128
'Phosvel zombies' 3: 119
residues at Love Canal 3: 120
subsidised and promoted by banks, private investment and Dept. of Agriculture mythology 3: 123
Plants — importance in Classical mythology 1: 15
Plato — cosmological world view 3: 130
Plutonium — problems and costs of reprocessing 2: 90-92
Plutarch — dialogues on animal virtues 1: 20
Poisons — loosed on the Third World by ruthless multinationals 3: 118-128
Politics — in the scientific communities of Australia and NZ 1: 33-43
Pollution — from nuclear discharges 2: 87
from pesticides 3: 130
Poverty — never alleviated by introduction of cash crops 3: 120-126
Power structures — in Australian Universities 1: 33-43
Prigogine — extensively quoted 5: 228-241
Pythagoras — respecter of life 1: 17

Radiation — causing continuing concern on Bikini 5: 222-227
following Harrisburg disaster 3: 138-142
at La Hague and Windscale 2: 86-88
Research — used to blind the public 1: 2-3
of dubious merit 1: 4-8
suppressed in Australian universities 1: 33-42
Reprocessing — of nuclear fuel 2: 82-83 6: 296-297
Riots — Toxteth, Brixton, Moss Side 4: 154-155
Roman — environmentalists 1: 12-20

Schistosomiasis — spreading in Blue Nile Province 1: 22
Scientists — attitudes to biotechnic revolution 5: 228-241
how far can they be trusted? 1: 2-3
is restraint feasible? 1: 9-10
suppressed in Australian and NZ universities 1: 33-43
values and priorities in doubt 5: 228-241
Silviculture — 2: 74-76
Smear campaigns — against scientists 1: 33-43
Social disintegration — in our inner cities 4: 154-155
Soyabeans — success story in USA 4: 158-159
Sudan — see Gezira

Technology — attitude of the Church 5: 202-203
Terania Creek — see Tropical forests
Thermodynamics — doubts about Second Law 4: 178-195
Third World — peasants always the losers when multinationals move in 3: 120-126
Three Mile Island — risks and costs of the clean-up 3: 138-142
Timber — Britains present needs 2: 67-69
World needs 2: 62-66
Trees — varieties recommended for reforestation 2: 76-79
sweet chestnuts ecologically and economically sound 2: 78
Tropical Forests — the battle for Terania Creek 1: 44-47
Urban unrest — 4: 154-155

Water — contamination following Three Mile Island disaster 3: 139
Wildlife — many species lost in the UK 2: 62
Windscale — visited by our editors 2: 82-92

Zombies — created by 'phosvel' pesticide 3: 119-120

DIGEST INDEX

Acid — in the River Usk 1
Acid Rain — 1; 2
Agriculture — loss of land 1
— organic is best 3
— resources: Rodale Report 5
Air Pollution — in London 3
Atmosphere — warming trend 5

Bird species — in decline 5
Breastmilk — contains PCBs 3

Cancer — and valium 1; 2
— and Ethylene Oxide 2
— and chlorination 2
— and herbicides 2; 3
— and atomic bombs 3
— and Windscale 3
— faking of research 4
— thousands of names of potential victims unrevealed 5
C.E.G.B. — Monopoly 3
Chemicals — in food 1; 3
— dioxin in the Great Lakes 1
— cause increase in pests 2
— PCBs in breastmilk 3
— and toxic wastes 3
— 2,4,5-T ban likely to go 4
— workers unaware of potential threat 5

Dounray — fast breeder reactor 1

Drugs — Valium 1; 2
— Debendox can cause birth defects 2
— Quixalin can cause blindness 2
— fail to control Malaria 5

Early warning computer system — unreliable in Colorado 4

False evidence — in medical research 4
Farmland loss — see agriculture
Floods — caused by felling 5

Germ warfare — tests in USA 2
Groundwater — purity threatened 2

Herbicides — 2,4,5-T 2; 4
— cancer risks 2
Hospitals — places of danger 3

Iatrogenic — illnesses 3

Kwashiorkor — from badly stored grain 5

Lakenheath — disaster 4
Lead — effects on other chemicals 1
— lead free petrol in Australia 2
— affects intelligence 5

Malaria — not controlled by new drug
Microwaves — 4

Monopolies — CEGB attacked 3

NASA — and radiation therapy 5
— fails to give proper warnings 5
NIOSH — (US National Institute for Occupational Safety) — undermined by Reagan Administration
Nuclear Accidents — cost of Three Mile Island clean-up 1
Nuclear Arms Race — 2
Nuclear Energy — accidents 1; 2; 3
— demonstrations 1; 3
— doomed 2
— dump sites 2
— in France 1; 2; 3
— in Florida 2
— in Germany 2
— health risks 1; 2
— leaks in Japan 3; 4
— low level radiation hazards 3
— radiation burns 2
— radiation leaks 1
— subsidized in U.S.A. 1
— in Switzerland 2
— and terrorists 1
Nuclear plants — fires in France 1
— construction halted by assassins 2
— accident at Sizewell 4
— at risk 5

Nuclear War — doctors oppose 3

PCBs — in breastmilk 3
Pesticides — DDT in Malaysia 1
— DDT exported to African countries 4
— resisted by superflies 1
— Dioxin in Great Lakes 1
— in the ground near Bolsover 3
Plutonium — on Cumbrian coast 5
— in Harwell soil 5
Pollution — at Niagara 1
— of drinking water 5
Processed foods — legal checks avoided 3

Radiation burns — 2
Radioactivity — 1; 2

Toxic wastes — 1; 2; 3

Uranium mining — 1

Vaccines — blamed for measles epidemic 2

Water — how long can it last? 5
Windscale — safety record 3
Wood — as a fuel 1

BOOKS REVIEWED

(OBR indicates a short notice in Other Books Received)

Ackerman, Bruce A and Hassler, William: Clean Coal, Dirty Air 4: 200 (OBR)
Allaby, Michael: A Year in the Life of a Field 5: 246-247 *(Ruth Lumley-Smith)*
Allaby, Michael and Bunyard, Peter: The Politics of Self-Sufficiency 3: 150-151 *(Ruth Lumley-Smith)*

Barrett, G. W. and Rosenberg, R: Stress Effects on Natural Ecosystems 6: 317 *(Michael Allaby)*
Bellamy, David: The Great Seasons 3: 148 *(Nicholas Gould)*
Bernard, Harold W: The Greenhouse Effect 3: 148 *(John Bruce Lamb)*
Berryman, Alan: Population Systems: A General Introduction 4: 199 *(Bernard Gilbert)*
Brazillier, George: Design for Evolution 5: 228f *(in an article by Edward Goldsmith)*
Bryce-Smith, Derek and Matthews, Robert: Lead or Health? 2: 100 *(Nicholas Kollerstrom)*
Bunyard, Peter: Nuclear Britain 6: 314-315 *(Ted Harrison)*
Bunyard, Peter and Allaby, Michael: see Allaby

Clark, Ronald W: The Greatest Power on Earth. The Story of Nuclear Fission 3: 151 (OBR)
Clement, J : see Lanly
Coates, Gary: Resettling America. Energy, Ecology and Community 6: 317 (OBR)

Dasman, Raymond: Wildlife Biology 3: 151 (OBR)
Dix, H.M.: Environmental Pollution 4: 149 *(John Bruce Lamb)*
Dixson, A.F.: The Natural History of the Gorilla 3: 151 (OBR)
Dobbs, Horace: Save the Dolphins: 6: 317 (OBR)

Freeman, Lesley J: Nuclear Witnesses: Insiders Speak Out 6: 314 *(Bernard Gilbert)*
Freethy, Ron: The Making of the British Countryside 3: 148 *(Robert Waller)*

Green, Bryn: Countryside Conservation 4: 199 *(Bernard Gilbert)*

Hallenstein, Dalbert: see Margerison
Hance, R. J. (Ed): Interaction Between Herbicides and the Soil: 4: 199 *(Bernard Gilbert)*
Hassler, William: see Ackerman
Hildyard, Nicholas: Cover Up: The Facts they don't want you to know 5: 242-243 *(Ruth Lumley-Smith)*
Hills, Lawrence D: Fertility Gardening. The Organic Way to Make Your Garden Grow 3: 151 (OBR)
HMSO: The Government Statement on the New Nuclear Programme 2: 101 *(Colin Sweet)*
Howard, Ted: see Rifkin

IUCN: Save the Rain Forests 1: 48-49 *(Alan Grainger)*

Jacobs, M: UNEP Rain Forests Document. Comments from a Botanist 1: 48-49 *(Alan Grainger)*
Jantsch, Erich: The Self-organising Universe 5: 228f *(in an article by Edward Goldsmith)*

Kennard, Peter and Sissons, Ric: No Nuclear Weapons 5: 242 *(Peter Bunyard)*

Lalonde, Brice: Sur La Vague Verte 3: 151 (OBR)
Lanly, J. P. and Clement, J: Present and Future Forest Planning Areas in the Tropics 1: 48 *(Alan Grainger)*
Large, Martin: Social Ecology: Exploring Post-industrial Society 4: 199 *(Michael Allaby)*

Mackie, Sheila and Bellamy, David: see Bellamy
Margerison, Tom, Wallace, Marjorie and Hallenstein Dalbert: The Superpoison 3: 151 (OBR)
Matthews, Robert: see Bryce-Smith
Mellanby, Kenneth: Farming and Wildlife 4: 198-199 *(Robert Waller)*
Moss, Graham, Britain's Wasting Acres 3: 149 *(John Bruce Lamb)*
Myers, Norman: Conversion of Tropical Moist

Forests 1: 48-49 *(Alan Grainger)*
McCullum, J: Fresh Fruit and Vegetables *and* Pulses, Seeds and Grains 4: 22 (OBR)

Neild, Robert: How to Make Your Mind up about the Bomb 5: 242 *(Peter Bunyard)*
Norman, Colin: The God that Limps: Science and Technology in the Eighties 6: 317 (OBR)

Panatti, Charles: Breakthrough 3: 151 (OBR)
Patterson, B. D. and Wistinghouse E.V.: Effects of Organic and Inorganic Fertilisers on Soils and Crops 6: 316 *(Peter Bunyard)*
Perry, Richard: Mountain Wildlife 3: 151 (OBR)

Ramberg, Bennett: Destruction of Nuclear Energy Facilities in a Nuclear War 5: 242 *(Peter Bunyard)*
Revelle, Charles and Penelope: The Environment: Issues and Choices for Society 3: 151 (OBR)
Rifkin, Jeremy and Howard Ted: Entropy 4: 178f *(in an article by Edward Goldsmith)*
Rivers, Patrick and Shirley: Diet for a Small Island 3: 148 *(Robert Waller)*
Roberts, Catherine: Science, Animals and Evolution 4: 197-198 *(Stephen Clark)*
Robinson, Harry: Population and Resources 4: 200 (OBR)
Rosenberg, R and Barrett, John: see Barrett
Royal College of Physicians: Medical Aspects of Dietary Fibre: A Report on the Commission of the RCP 3: 149÷150 *(David Greenstock)*
Ryle, Sir Martin: Towards a Nuclear Holocaust 4: 242 *(Peter Bunyard)*

Selman, Paul H: Ecology and Planning 4: 199 *(Bernard Gilbert)*
Shapiro, Mark: see Weir
Shoard, Marion: The Theft of the Countryside 3: 148 *(Robert Waller)*
Simmons, I.G.: The Ecology of Natural Resources 3: 149 *(John Bruce Lamb)*
Sissons, Ric and Kennard, Peter: No Nuclear Weapons 5: 242 *(Peter Bunyard)*
Skolimowski, Henryk: Ecophilosophy. Designing New Tactics for Living 4: 196-197 *(Jeremy Naydler)*
Snow, C.P.: The Physicists 6: 315-316 *(Jeremy Naydler)*
Sperlinger, David (Ed): Animals in Research: New Perspectives in Animal Experimentation 5: 243-244 *(Catherine Roberts)*
Stephens, Jack: Three Mile Island 5: 245-246 *(Ian Walsh)*
Sternglass, Ernest: Secret Fallout 5: 242 *(Peter Bunyard)*
Stokes, Bruce: Helping Ourselves. Local Solutions to Global Problems 4: 200 (OBR)
Sweet, Colin: The Fast Breeder Reactor 1: 50-51 *(Peter Bunyard)*

UNEP: Overview Document for Experts Meeting on Tropical Forests, Libreville March 1980 1: 48-50 *(Alan Grainger)*
Rain Forests Document: Comments from a Botanist. 1: 48 *(Alan Grainger)*
